Yearbook Advisors: Bob Gallagher and Marilyn Downes

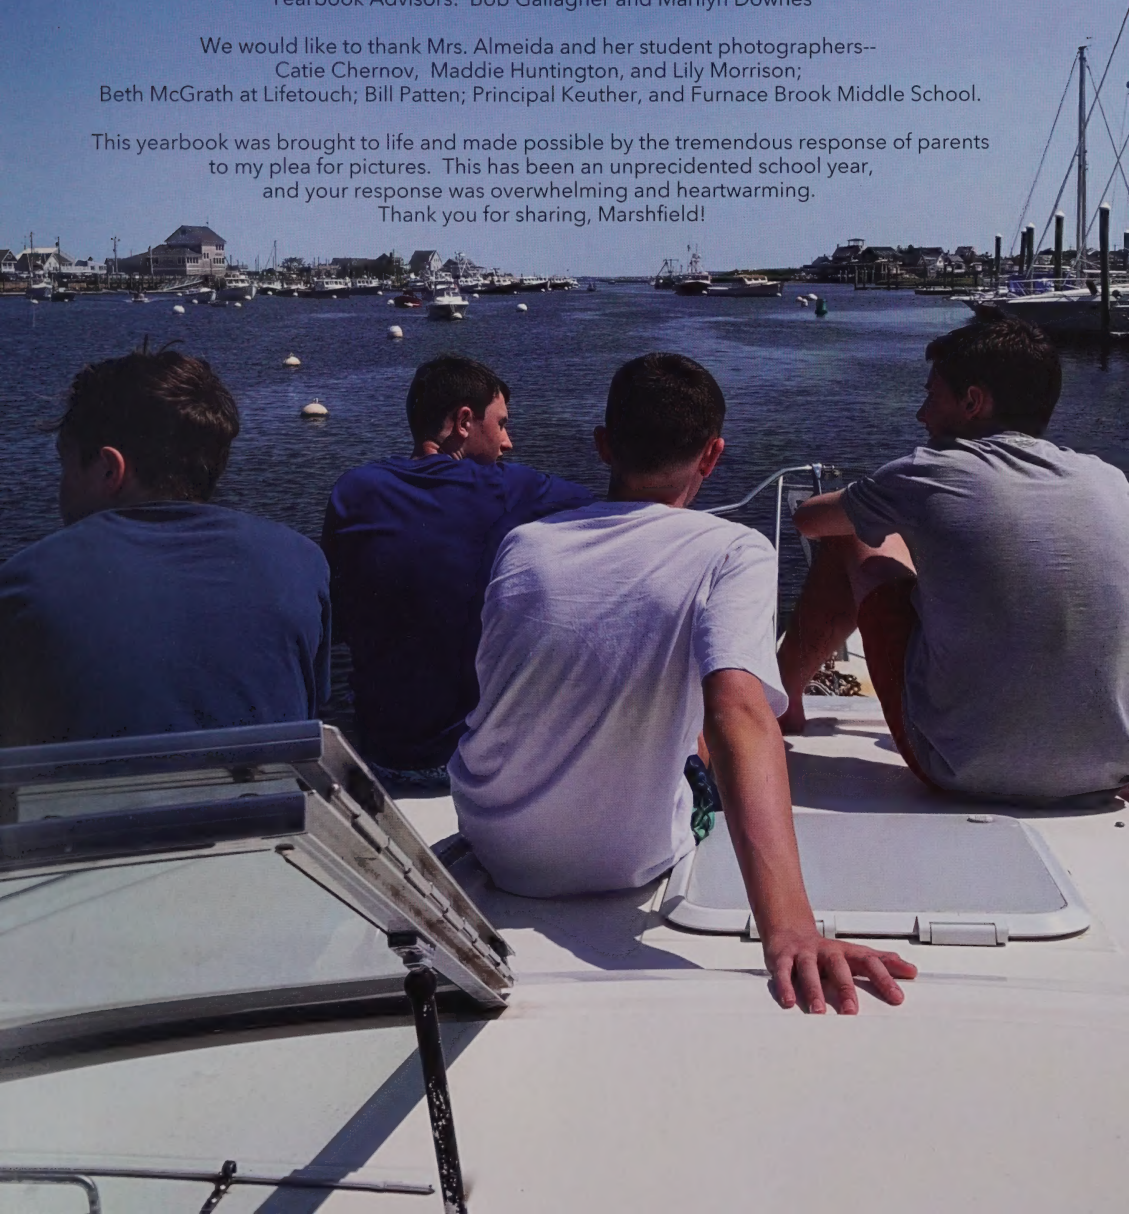

We would like to thank Mrs. Almeida and her student photographers--

Catie Chernov, Maddie Huntington, and Lily Morrison;

Beth McGrath at Lifetouch; Bill Patten; Principal Keuther, and Furnace Brook Middle School.

This yearbook was brought to life and made possible by the tremendous response of parents to my plea for pictures. This has been an unprecedented school year, and your response was overwhelming and heartwarming.

Thank you for sharing, Marshfield!

Letter from Principal Keuthner

Class of 2020,

It has been an incredible four years for your class at MHS. We have celebrated the excellence of your class in the classroom, on the stage, on our fields, and in leadership across the Commonwealth of Massachusetts. You have left your imprint on our community and we look forward to seeing you change the world.

As you depart, I remind you of how we started our school year. We challenged the entire student body to, "Start with Hello", to value everyone, to be inclusive at all times, and to develop meaningful relationships within our school community. It is now your responsibility to bring that mindset to your next community. Our world desperately needs to value everyone, to care for each individual, to respect all individuals, to understand the importance of human interaction and invest in each other.

Place this challenge at the forefront of your next experience and care for others.

Best wishes,

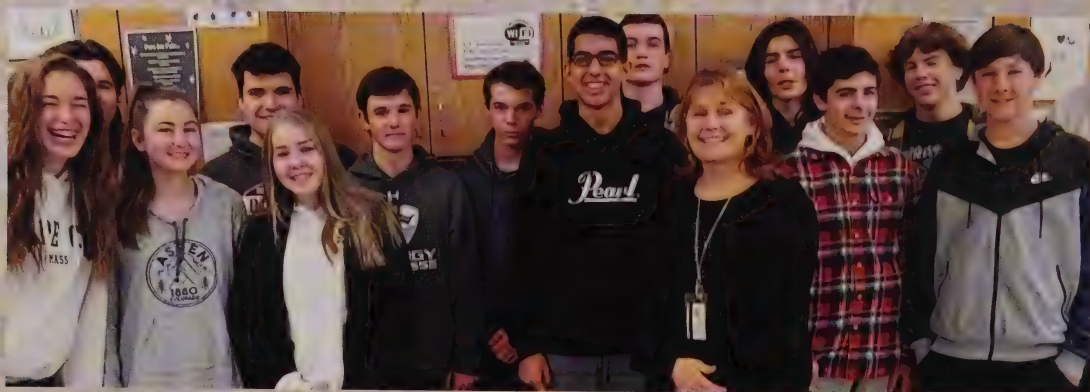

Mr. K.

This Yearbook is Dedicated to our Favorite Teachers:

Mrs. Salamone

She actually cares!

I think the yearbook should be dedicated to Mrs. Salamone. Mrs. Salamone always teaches with a smile and a positive attitude, no matter the day. She is kind-hearted and truly cares about her students. Spanish can be difficult, but no matter if she's teaching level I sophomores, or AP seniors, she's always there for help. She loves what she's teaching and she wants the students to love it too. Even in the stupidest mess ups, which I often have, she will politely help me correct myself. Mrs. Salamone is a very deserving yearbook dedicatee.

Patricia Salamone and Kelly Steele

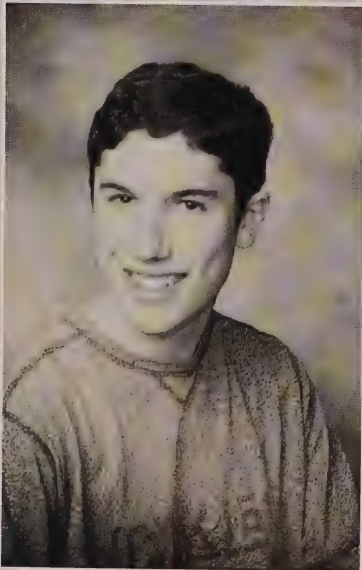

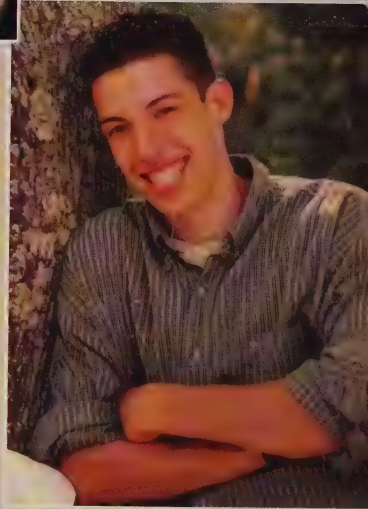

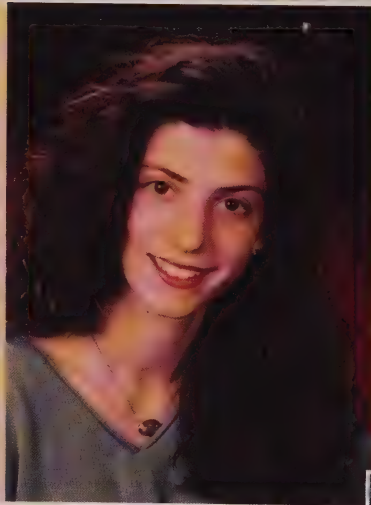

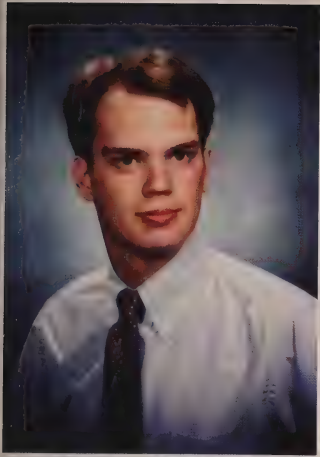

I would like to see the Yearbook dedicated to Ms. Steele because Ms. Steele was the best teacher I ever had. She put a new perspective on a class for me, no matter how my day was going. I always wanted to go to her class because it was fun and would change my day around.

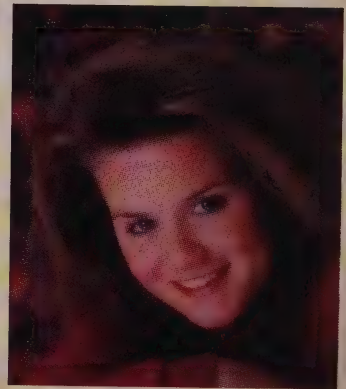

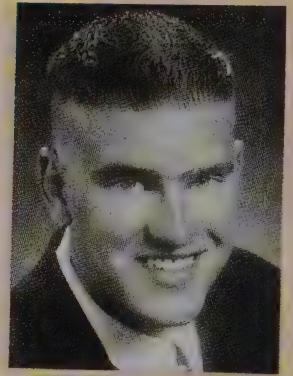

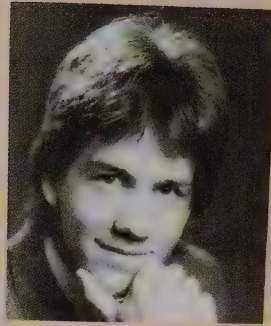

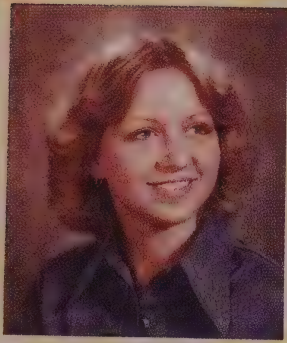

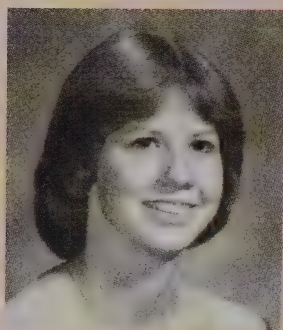

Ms. Steele is literally my queen and the sweetest human being.

Thank You To Our Class Advisors:

Ms. Gage and Mrs. Plumeri

"They have done so much for our class and deserve everything."

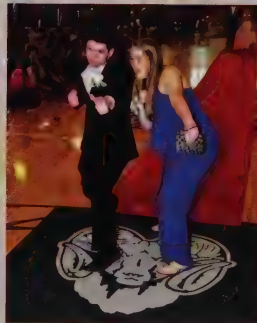

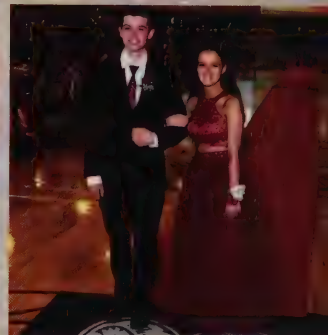

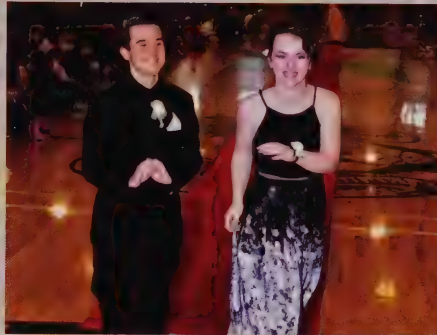

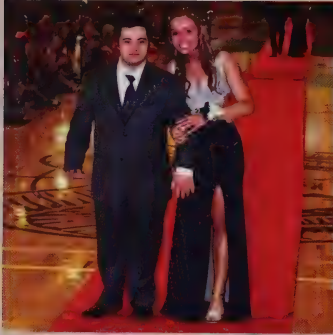

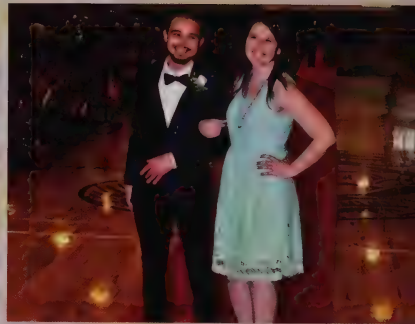

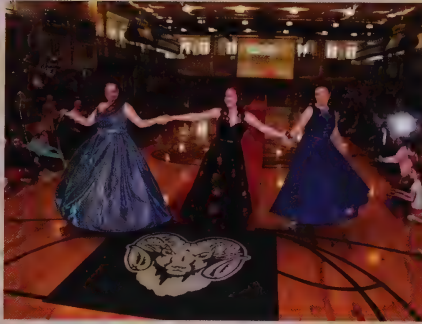

"They worked extremely hard to make sure our class had the best four years here at MHS and they are both amazing teachers on top everything they have to do as advisors."

"Mrs. Plumeri has helped us ever since freshman year with planning, fundraisers, prom and much more. Easy pick ..."

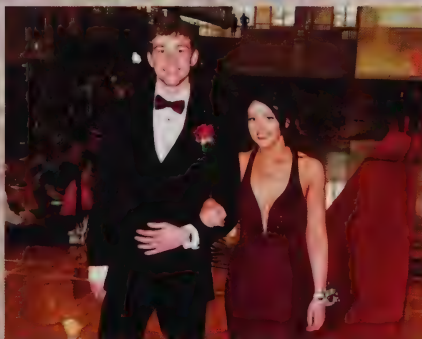

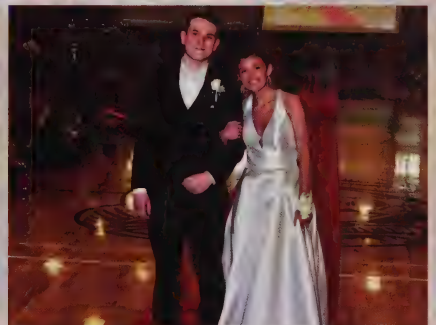

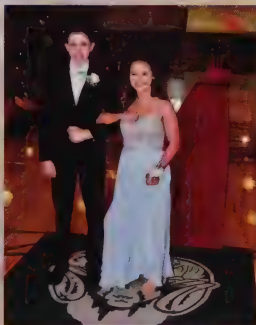

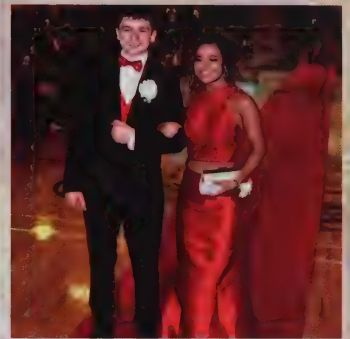

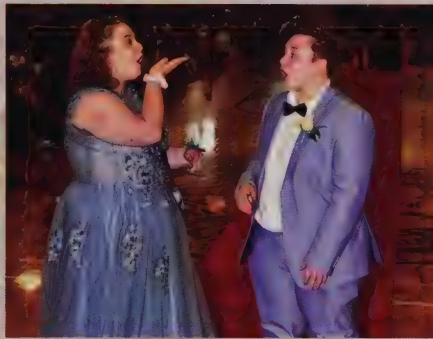

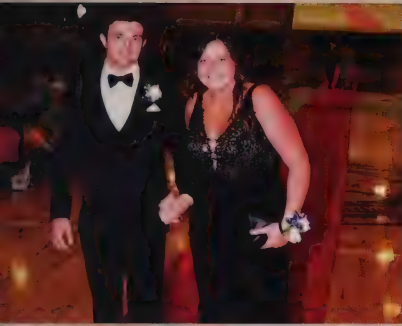

"Ms. Gage always has a smile on her face no matter what. Every time I pass her in the hall, she always greets you with the warmest greeting that makes your day so much better."

The walk lasted 7 hours and 17 minutes as they spoke to NASA, shared their mission through cameras on their helmets and even voiced a call with President Trump.

IMPEACHMENT

The House of Representatives approved 2 articles of impeachment, which means to bring charges in Congress that will form the basis for a trial, against President Donald Trump. This made him the 3rd U.S. president after Andrew Johnson and Bill Clinton to face removal from office by the Senate. On February 5th, 2020, President Trump was acquitted of all charges.

ANCIENT CITY UNCOVERED

The lost city of Mahendraparvata was fully uncovered in Cambodia, after years of archeological investigation. The city, believed to be the first capital of the Khmer Empire during the 9th century, had long-evaded archaeologists due to the thick jungle obscuring the remaining buried urban network. Using research techniques from the ground and sky, researchers were able to fill in many aspects of the cityscape.

CORONAVIRUS PUTS WORLD ON HIGH ALERT

A coronavirus outbreak in Wuhan, China, prompted officials to issue the largest quarantine in human history, putting 16 cities with an estimated 46 million people on lockdown. .ORG DOMAIN SOLD

The internet domain .org was sold to private investment firm Ethos Capital. Nonprofits such as the YMCA and Girl Scouts of America, which occupy most of the .org sites, feared the sale would result in yearly price increases, censorship and websites closing. Ethos Capital assured they would keep .org accessible and moderately priced.

YOUTH MARCH AGAINST CLIMATE CHANGE

More than 4 million young people from around the world filled the streets to inspire their leaders to address climate change. The movement calls for action to stop the earth's rising temperatures, which are known to be caused by the burning of fuels and other human activities.

16-year-old Greta Thunberg, who was named Time magazine 2019 Person of the Year, led the weeklong global event while giving important speeches about climate change in meetings of world leaders.

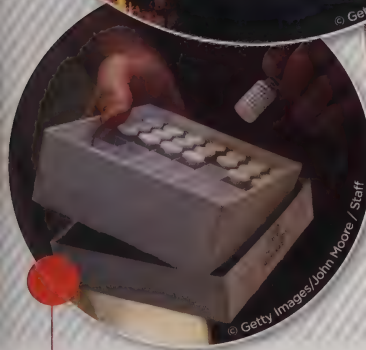

GOOGLE TO OFFER CHECKING ACCOUNTS

Google is planning to offer checking accounts to help people accomplish more online. Restoration of Notre Dame is currently underway, thanks to generous contributions from around the world.

The first vaccine for the highly infectious Ebola virus was approved by the U.S. Food and Drug Administration. The decision allows the vaccine Ervebo to be used more widely in countries at high-risk of the disease. The hope is to continue the distribution of Ervebo, worldwide.

RESTAURANTS DITCH DINING ROOMS

With the surge in online ordering and food delivery services like Uber Eats and Grubhub, restaurants are increasingly removing their dining rooms to focus on delivery and pickup. New York eatery Chopt removed its tables and cash registers in favor of online ordering and payment. Customers then had the option to grab-and-go their order at the restaurant, or have it delivered. Chick-fil-A and Starbucks also opened their first delivery-only kitchens in different U.S. locations.

HOLOCAUST ARCHIVE DIGITIZED

The world's largest archive of Holocaust victim records is now available to the public. Over 50 people were arrested in the largest college-admission scam to ever be prosecuted by the U.S. Department of Justice. Unbeknownst to the students, the parents conspired in various schemes to pay an admissions consultant a combined \$25 million to defraud college entrance exams and athletic recruiting to be admitted to elite colleges and universities.

NEW SYSTEM DETECTS TINY TUMORS

Researchers at MIT have developed a new optical imaging system that can locate tiny tumors deep inside the body. The technique, called DOLPHIN, uses near-infrared light wavelengths to penetrate body tissue and locate tumors as small as 200 cells, then duplicate the image and analyze it using a process called hyperspectral imaging. The researchers believe DOLPHIN will help with the earlier detection of cancers.

HIGHS AND LOWS

In addition to being the first to dive into the deepest points of the earth's five oceans, Victor Vescovo is also the only person to visit the very top (Mt. During each dive, Vescovo discovered new species and encountered a number of interesting ocean creatures including a rarely seen spoon worm at almost 23,000 feet and a snailfish.

FLYING CARS BECOMING A REALITY

Porsche and Boeing have teamed up to build flying cars. The vehicles are electric and allow riders to soar over congested cities. GIANT FOSSIL DISCOVERED

Scientists digging in North Dakota found a giant fossil that revealed what happened after a meteorite struck the Earth 66 million years ago. NATURAL REMEDY FOR SKUNK ODOR

Researchers have uncovered a fungi that can neutralize the pungent odor of a skunk's spray. The fungi, *Tolypocladium*, creates a natural chemical called pericosine, which scientists tested against two compounds found in skunk spray. The results showed that it was able to remove the odor from the compounds. After slightly modifying the pericosine further, they were able to create a remedy for skunk stench that would be safe and effective on skin.

SCIENCE & DISCOVERY

BLACK HOLE PHOTOGRAPHED

For the first time in history, a black hole was photographed in space by a group of international radio telescopes called the Event Horizon Telescope. The enormous black hole is 55 million light-years from Earth. Black holes have long been a mystery to scientists seeking to understand the phenomenon. This picture is the culmination of more than a century of work by scientists and confirms the existence of black holes that was first theorized by Albert Einstein.

• REVOLUTIONARY PILL

Scientists are developing a pill that can detect gut problems that lead to serious ailments like colon cancer and Crohn's disease. Once swallowed, the pill is designed to find symptoms using pictures that are seen by doctors in real time. The pill can also be halted to study areas, then pulled after the diagnosis is complete. This has significantly reduced the impact of diagnostic procedures that previously required invasive measures.

• EARTH-FRIENDLY IPHONE 11

Apple released its new iPhone 11, which used recycled rare earth elements in key components. These recycled materials were used to create the glass button pane on the front of the phone. BIONIC EYE FOR THE BLIND

Second Sight, a California-based company, developed a groundbreaking bionic eye called Orion to help those who have lost their vision to recognize movement, light and darkness. The system, which is implanted into the brain, works with a tiny camera mounted on sunglasses to convert images of what is occurring in front of the person. This has helped people cross the street safely, sense car headlights at night and even blow out birthday candles.

SHOES FOR MEDICAL PROFESSIONALS

Nike designed a new shoe to support medical workers who are on their feet all day. Developed and tested with actual hospital staff, the new Air Zoom Pulse is easy to wipe off and clean, and the outer rubber soles have extra traction to prevent slipping. The shoe also offers the comfort of an enhanced mid-sole and heel, ideal for the continuous standing and walking medical workers must perform daily.

CAR SAFETY FEATURE DETECTS KIDS AND PETS

Scientists at the University of Waterloo have developed an affordable new car safety feature that can detect whether children or animals have been left inside. The small disc-shaped sensor, which attaches to a vehicle's rear view mirror or ceiling, uses radar technology and artificial intelligence to sense breathing movements in the car. If detected, the system prevents the car from locking and releases an alarm to alert bystanders.

OCEAN CLEANUP BEGINS

The Ocean Cleanup's mechanism designed to collect plastic from the Great Pacific Garbage Patch reached success. The system was invented by Boyan Slat when he was 18 years old and is designed to collect plastic pollution by working with the natural forces of the ocean. Along with large plastics, the system has also been able to catch abandoned fishing nets and plastics as small as 1 mm, known as microplastics.

DRONES FOR DELIVERIES
